

Reflection

Combined Science - Physics - Key stage 4 - Waves

Mr Benyohai

Independent practice

1. What is the normal?

The normal is a line drawn p_____ to the m_____ i_____

2. What were your independent and dependent variables?

3. Where are the angles of incidence and reflection measured?

4. Why should you draw your normal, mirror and angles of incidence before starting the practical?

5. What is the biggest source of error in the investigation?

What's wrong with the diagram below?
