Question 1

For each equation:

1. What is the fewest number of jumps you can complete it in?
2. Can you complete it in an even number of jumps?
3. Can you complete it in an odd number of jumps?

$$856 \div 8 = ?$$

$$476 \div 4 = ?$$

$$633 \div 3 = ?$$

$$474 \div 6 = ?$$

Question 1 Answers

For each equation:

1. What is the fewest number of jumps you can complete it in?
2. Can you complete it in an even number of jumps?
3. Can you complete it in an odd number of jumps?

$$856 \div 8 = 107$$

$$476 \div 4 = 119$$

$$633 \div 3 = 211$$

$$474 \div 6 = 79$$
