

Practical - Human Variation

Biology - Key Stage 3

Reproduction - Lesson 13

Mr Wyatt

These statements about graphs are incorrect. Write the correct versions.

The Y axis is along the bottom and the X axis is up the side.

The controlled variable goes on the x axis.

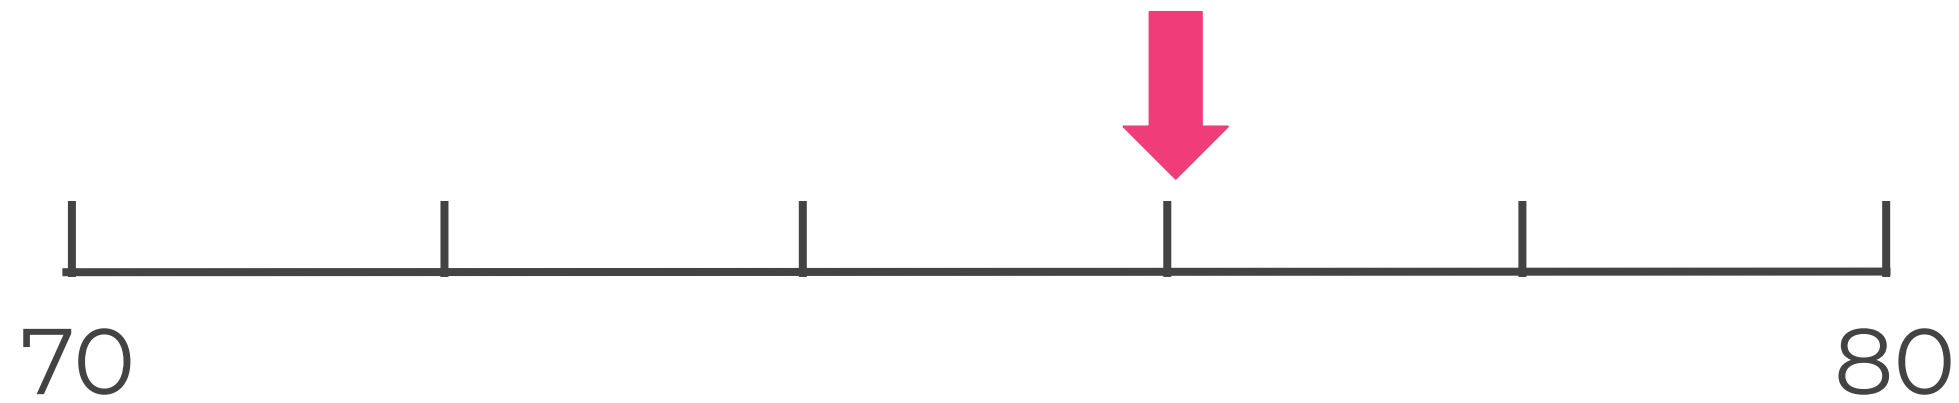

The scale should never start at 0.

The scale should go up in different numbers each time.

The scale should have 1cm or 2cm between each number.

Identify which number is being pointed at on each scale.

Draw a graph and plot the data below.

Plant	Amount of water	Number of leaves
1	50	3
2	100	5
3	150	6
4	200	9
