Mr Nieto

Question 1

Mr Slade had 600 ml of juice left to give to three moles after a hard day's work. He shared it by pouring the same amount into each of their cups. How much juice did they get each?

Question 2

Melvin, Buttons and Addy collected rubbish from the school field each day they were at school. They collected three times less rubbish on Friday compared to Monday. They collected 3 kg and 600 g of rubbish on Monday. How much did they collect on Friday?

Question 3

Addy and Melvin collected cans for recycling, weighing them each month. In April they collected 1 kg and 300 g but in May they collected twice as much. What was the weight of the cans they collected in May?
