Question 1

Using a division strategy of your choice, create the following...

1. Create a 3-digit number divisible by 2
2. Create a 3-digit number divisible by 3
3. Create a 3-digit number divisible by 4
4. Create a 3-digit number divisible by 5
5. Can you find a 3-digit number divisible by 6, 7, 8 or 9?

Answer

There are many different answers you could have found for each one. Use the inverse, multiplication, to check your workings.

Complete the sentence stem to check your answers.

**_____ ÷ _____ = _____ So I know that _____
x _____ = _____. _____ is a multiple of
_____ because it divides equally by _____ .**
