

Using Doubling or Halving to Calculate Efficiently

Worksheet

Mathematics

Mrs Behan

Independent task

For each calculation, use one of the mental strategies you have learnt in this lesson..

Write down any jottings that help you to remember your calculations - if you don't need to write anything down that is fine.

Complete the sentence to explain which strategy you have used.

$27 \times 4 =$ _____

I used a _____ strategy _____ times.

$33 \times 4 =$ _____

I used a _____ strategy _____ times.

$22 \times 8 =$ _____

I used a _____ strategy _____ times.

$76 \div 4 =$ _____

I used a _____ strategy _____ times.

$19 \times 8 =$ _____

I used a _____ strategy _____ times.

$92 \div 4 =$ _____

I used a _____ strategy _____ times.
