## Solving word problems about capacity and volume Lesson 8 of 10

Miss Jones

## Independent task 1

## Don't forget the unit of measure!

Q1.) Shannon collects two types of medicine for her Grandad.
She collects $\mathbf{4 0} \mathbf{~ m l}$ of one type and $\mathbf{8 0} \mathbf{~ m l}$ of another.
How much medicine does she need for her Grandad?
Shannon needs $\qquad$ of
medicine for her Grandad.

Q2.)Debbie needs $\mathbf{2 4} \mathbf{~ m l}$ of medicine and Tom needs 45 $\mathbf{m l}$ of medicine.
How much medicine do they need altogether?
Altogether, Debbie and Tom need $\qquad$ of medicine.

## Independent task 2

## Don't forget the unit

 of measure!Q3.) Doctor Milly Litre is making some medicine. She needs $\mathbf{7 4} \mathbf{~ m l}$ but has dropped some on the floor.
The doctor is left with 29ml. How much does she now need to make to reach $\mathbf{7 4} \mathbf{~ m l}$ ?
Doctor Milly Litre needs $\qquad$ to reach 74 ml .

Q4.) Doctor Milly Litre has got a beaker with a capacity of $\mathbf{5 5} \mathbf{~ m l}$. She has put $\mathbf{3 3} \mathbf{~ m l}$ of medicine in.
How much more can she fit into the beaker until it has reached full capacity? She can fit $\qquad$ more into the beaker.
