Mr Langton

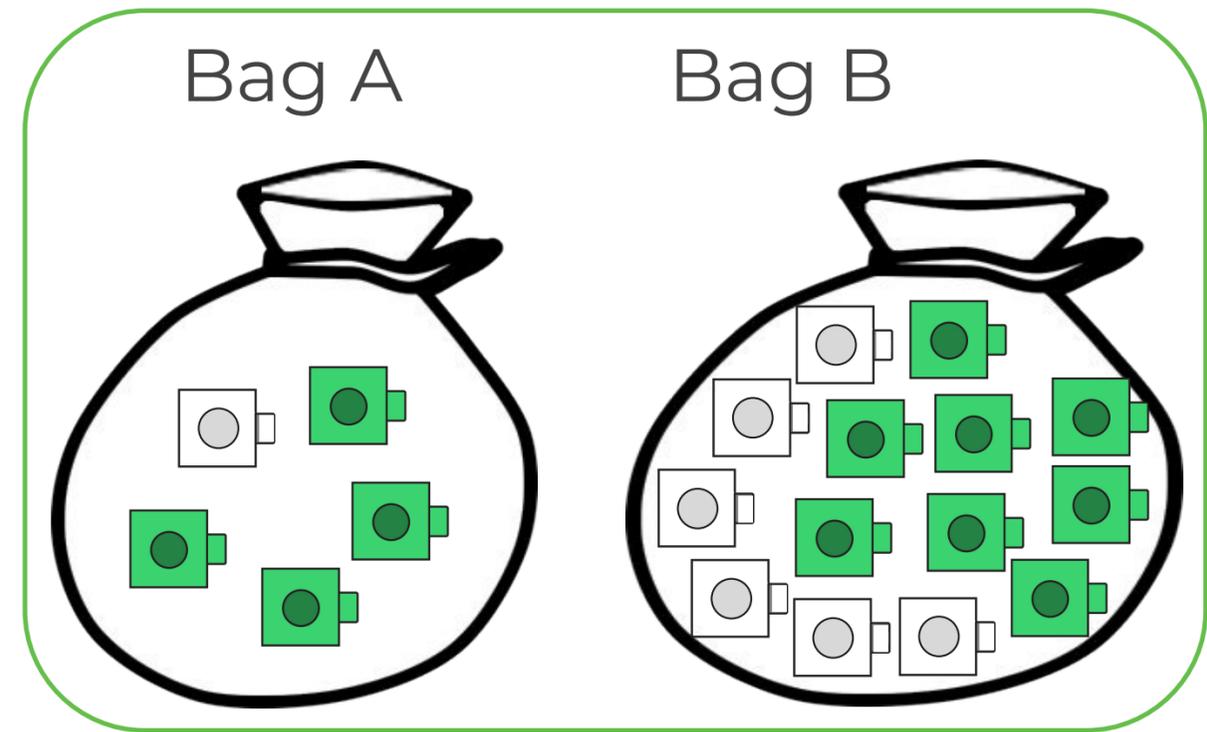

Calculating the probability of combined events

I spin two spinners. They are equally likely to land on a 1, 2, or 3. Complete the probabilities for the sample space.

Calculate the probability that both spinners score greater than 1

Bag B

Bag A	$\frac{1}{5}$ $\frac{4}{5}$	

- Complete the probabilities for each outcome.
- What is the probability that I pick one of each colour?
