

Computing

Lesson 4: Calculate and Duplicate

Data and Information

Charu Walia

Task 1 - Using four operations

Please follow the link on the final slide to download additional resources for this lesson and open the 'using the four operations' spreadsheet.

In the spreadsheet answer the questions using cell references and mathematical operators. There are four tabs along the bottom of the page each referring to one of the different operations.

Task 2- Times table score

Please follow the link on the final slide to download additional resources for this lesson and open the 'Time table scores' spreadsheet.

In the spreadsheet work out SUM and AVERAGE for each child.

Task 3: Large data sets

Please follow the link on the final slide to download additional resources for this lesson and open the 'shopping' spreadsheet.

In the spreadsheet duplicate formulas and apply formula to a range of cells.
