

How has the discovery of DNA changed science?

Science

Miss Simkin

What is DNA?

Fill in the gaps:

Inside every cell there is _____. DNA is the material that carries the _____ that a living organism needs.

What is DNA?

Draw and label DNA:

Story of discovery

Use the template to draw your comic:

1)	2)	3)
<hr/> <hr/> <hr/> <hr/>	<hr/> <hr/> <hr/> <hr/>	<hr/> <hr/> <hr/> <hr/>

- Watson and Crick
- Rosalind Franklin
- Friedrich Miescher
- Isolated from a cell
- X-ray photograph of DNA
- Published paper on DNA's structure

Scientific developments

Answer the questions:

1. Describe two scientific developments that have occurred due to the discovery of DNA.
