# Internet Services

## Lesson 5 of 6

Allen Heard

# Task 1 - Match-up

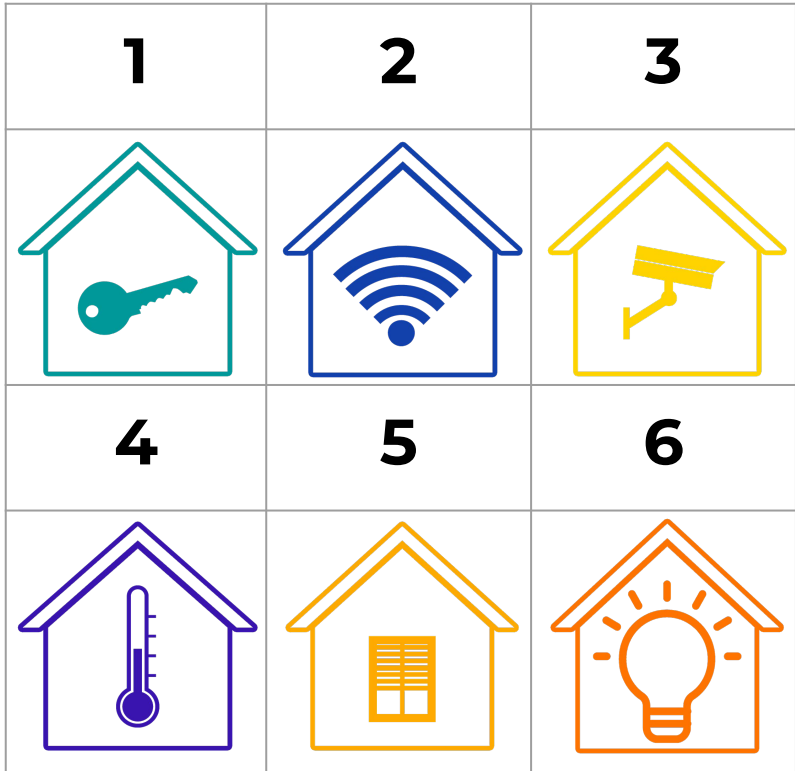

Match the term to the definition/statement by drawing a line between them.

Term	Definition/Statement
VoIP	Part of the internet that contains websites and web pages
Spam	Inventor of the World Wide Web
Internet services	A vast network of computers all connected together
Tim Berners-Lee	Describes a number of activities that are provided over the internet, including VoIP, email, and the WWW
World Wide Web	Emails that are unwanted
Internet	Allows voice data to be sent over the internet

# Task 2 - Smart home

Match the descriptions of Internet of Things (IoT) devices with the icons shown.

Credit: Pixabay

Icon number	Description
	Allows you to set the temperature of your house remotely
	Senses the level of light to raise and lower your window blinds
	Allows you to secure your house without needing a key
	Allows you to view CCTV footage remotely via your mobile phone
	Allows you remote control of lighting in each room in the house
	Allows you to set up and configure all IoT devices connected to your wireless network
