

# **Unit 2: Multiplication and Division**

## **Long Multiplication**

### **Independent Task**

Mr Whitehead

# Independent Task

Question 1

$$353 \times 47$$

Question 2

$$614 \times 34$$

Question 3

$$506 \times 4.6$$

- Estimate a solution first
- Use an efficient strategy to solve the problems (area model, place value grid and counters, long multiplication).

## Read for a Challenge?

If you have solved the problem using one strategy, try it again using a second or third strategy.
