

What are organs and why do we need them?

Science - Human Anatomy

Miss Hummel

Answer these questions:

1. What is an organ?
2. What do you need to do to keep your organs healthy?

Preparation for the rest of the lesson:

Organ	Main function (job)

Which organ are these definitions referring to?

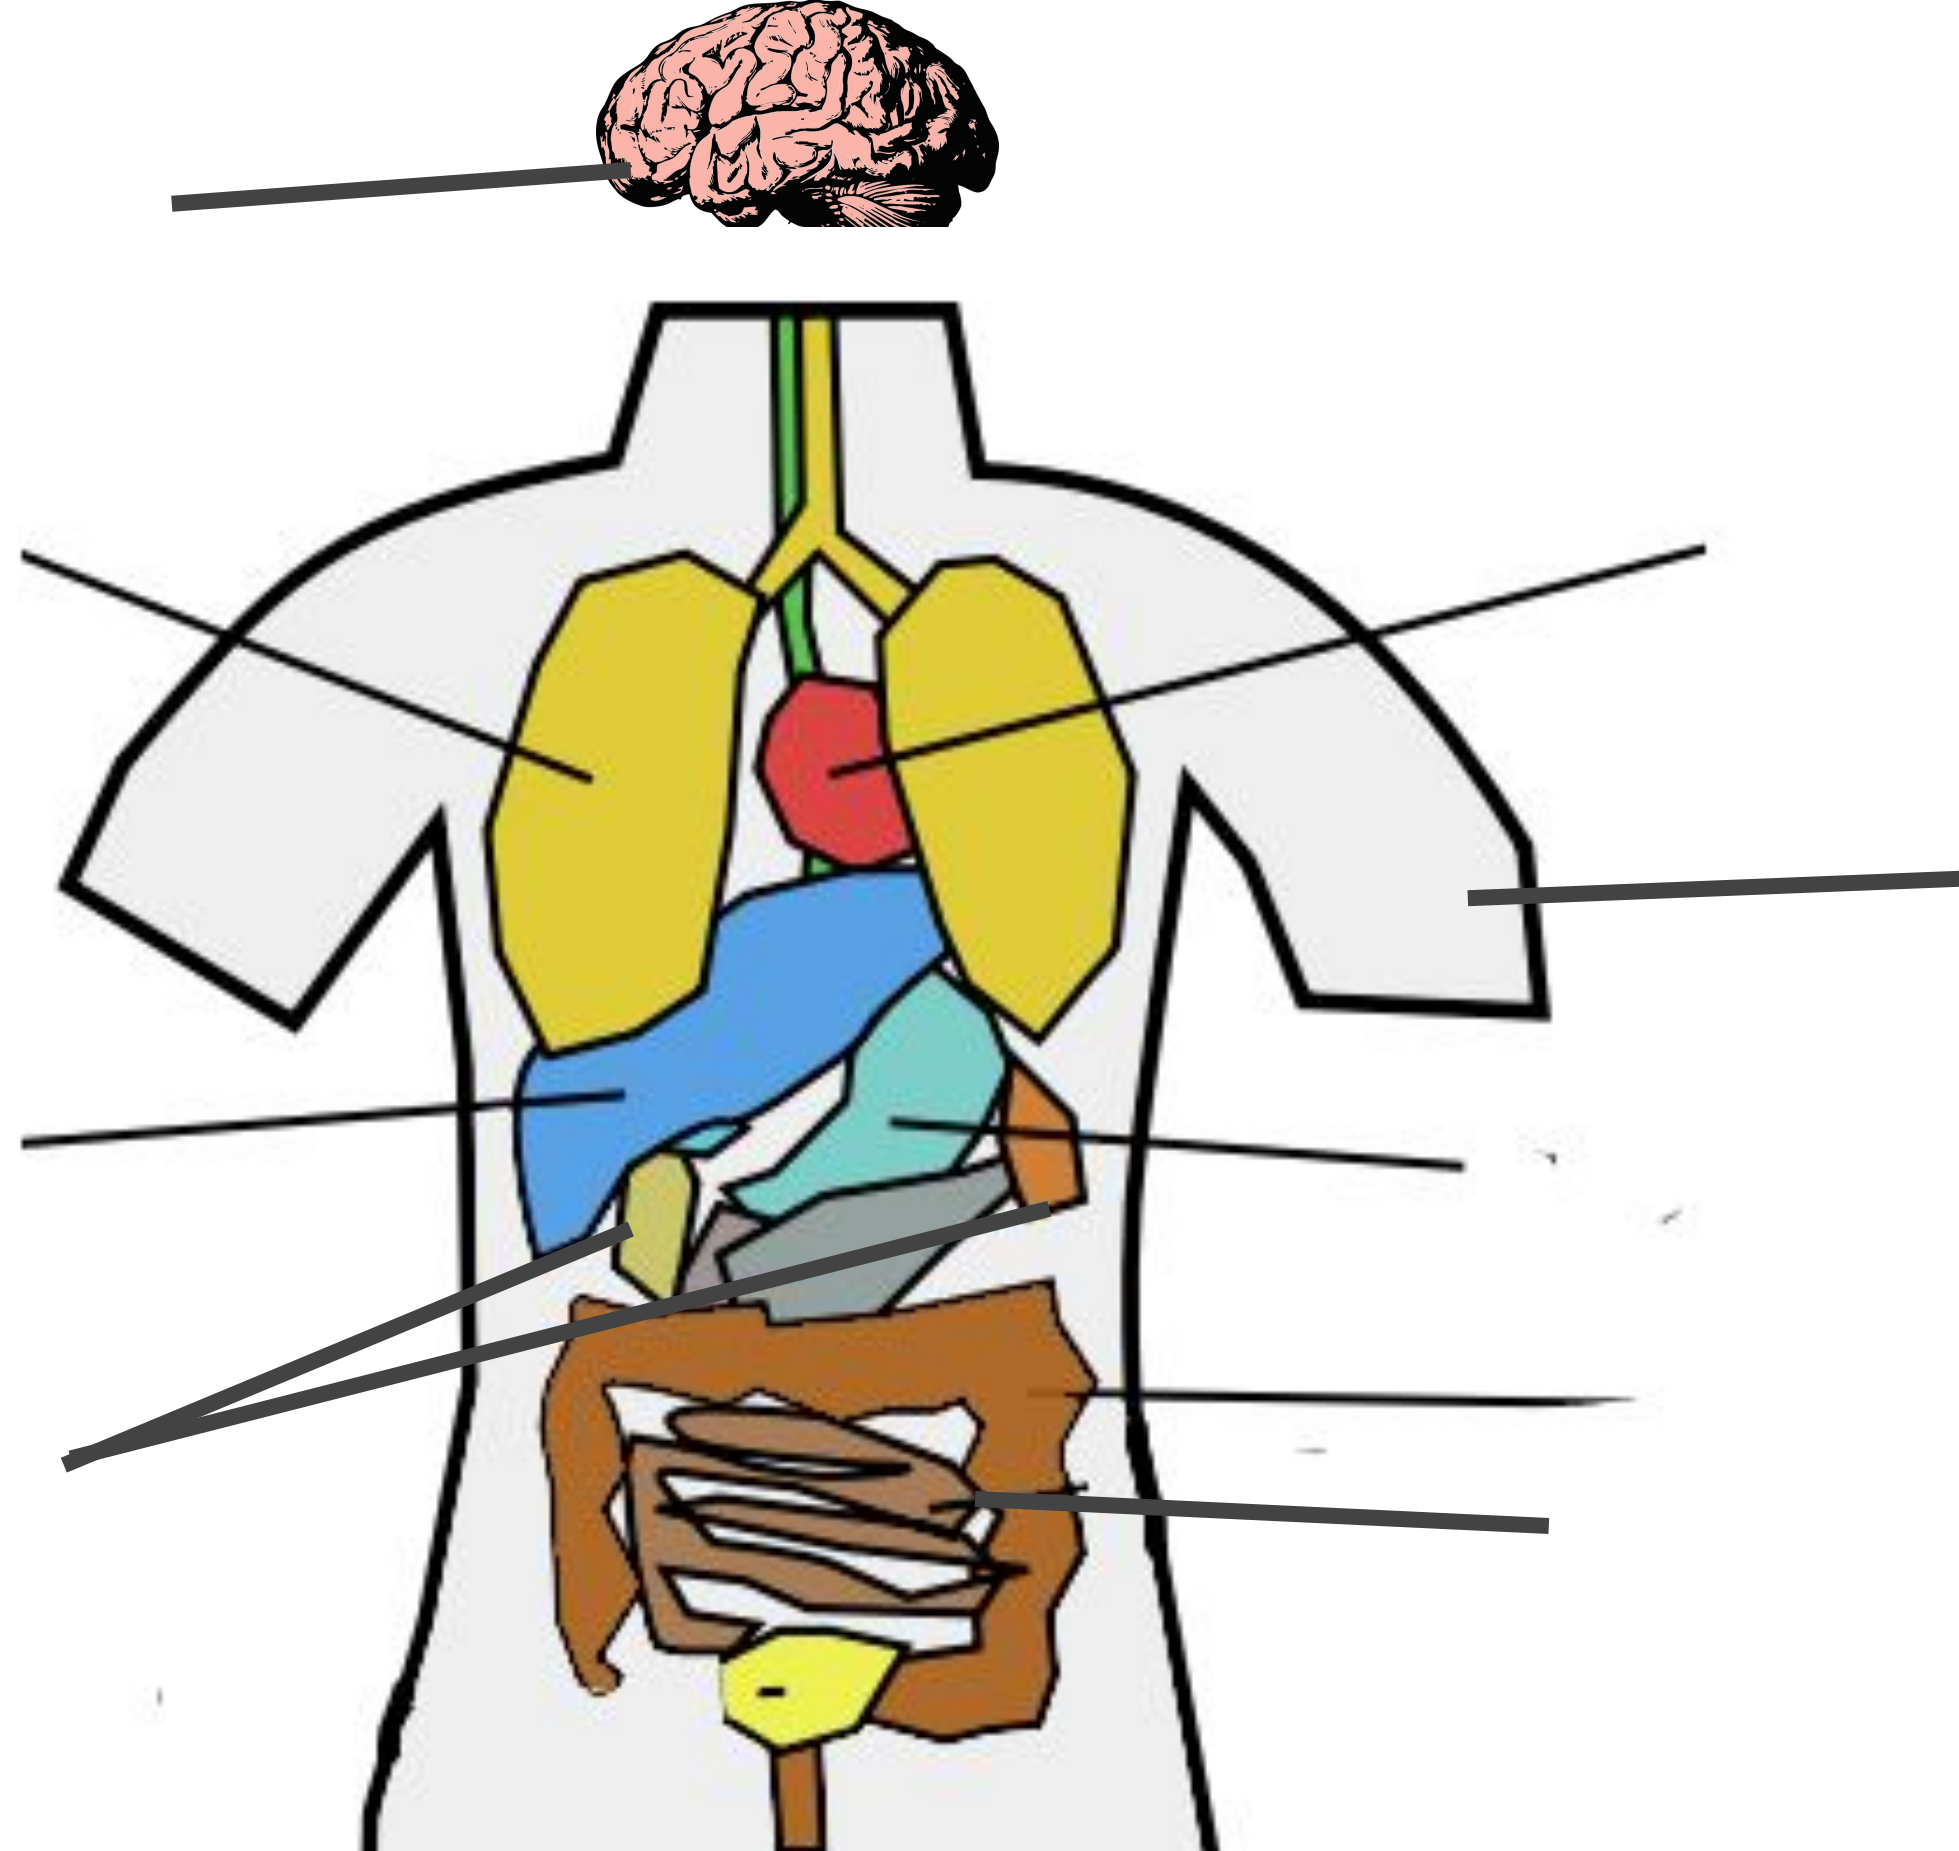

- 1.** Pumps blood around the body.
- 2.** The centre of where we make decisions and control the entire body.
- 3.** Filters the liquid in our body and produces urine

Acting out task:

Can you think of some actions to help you remember the main functions of the organs we have discussed?

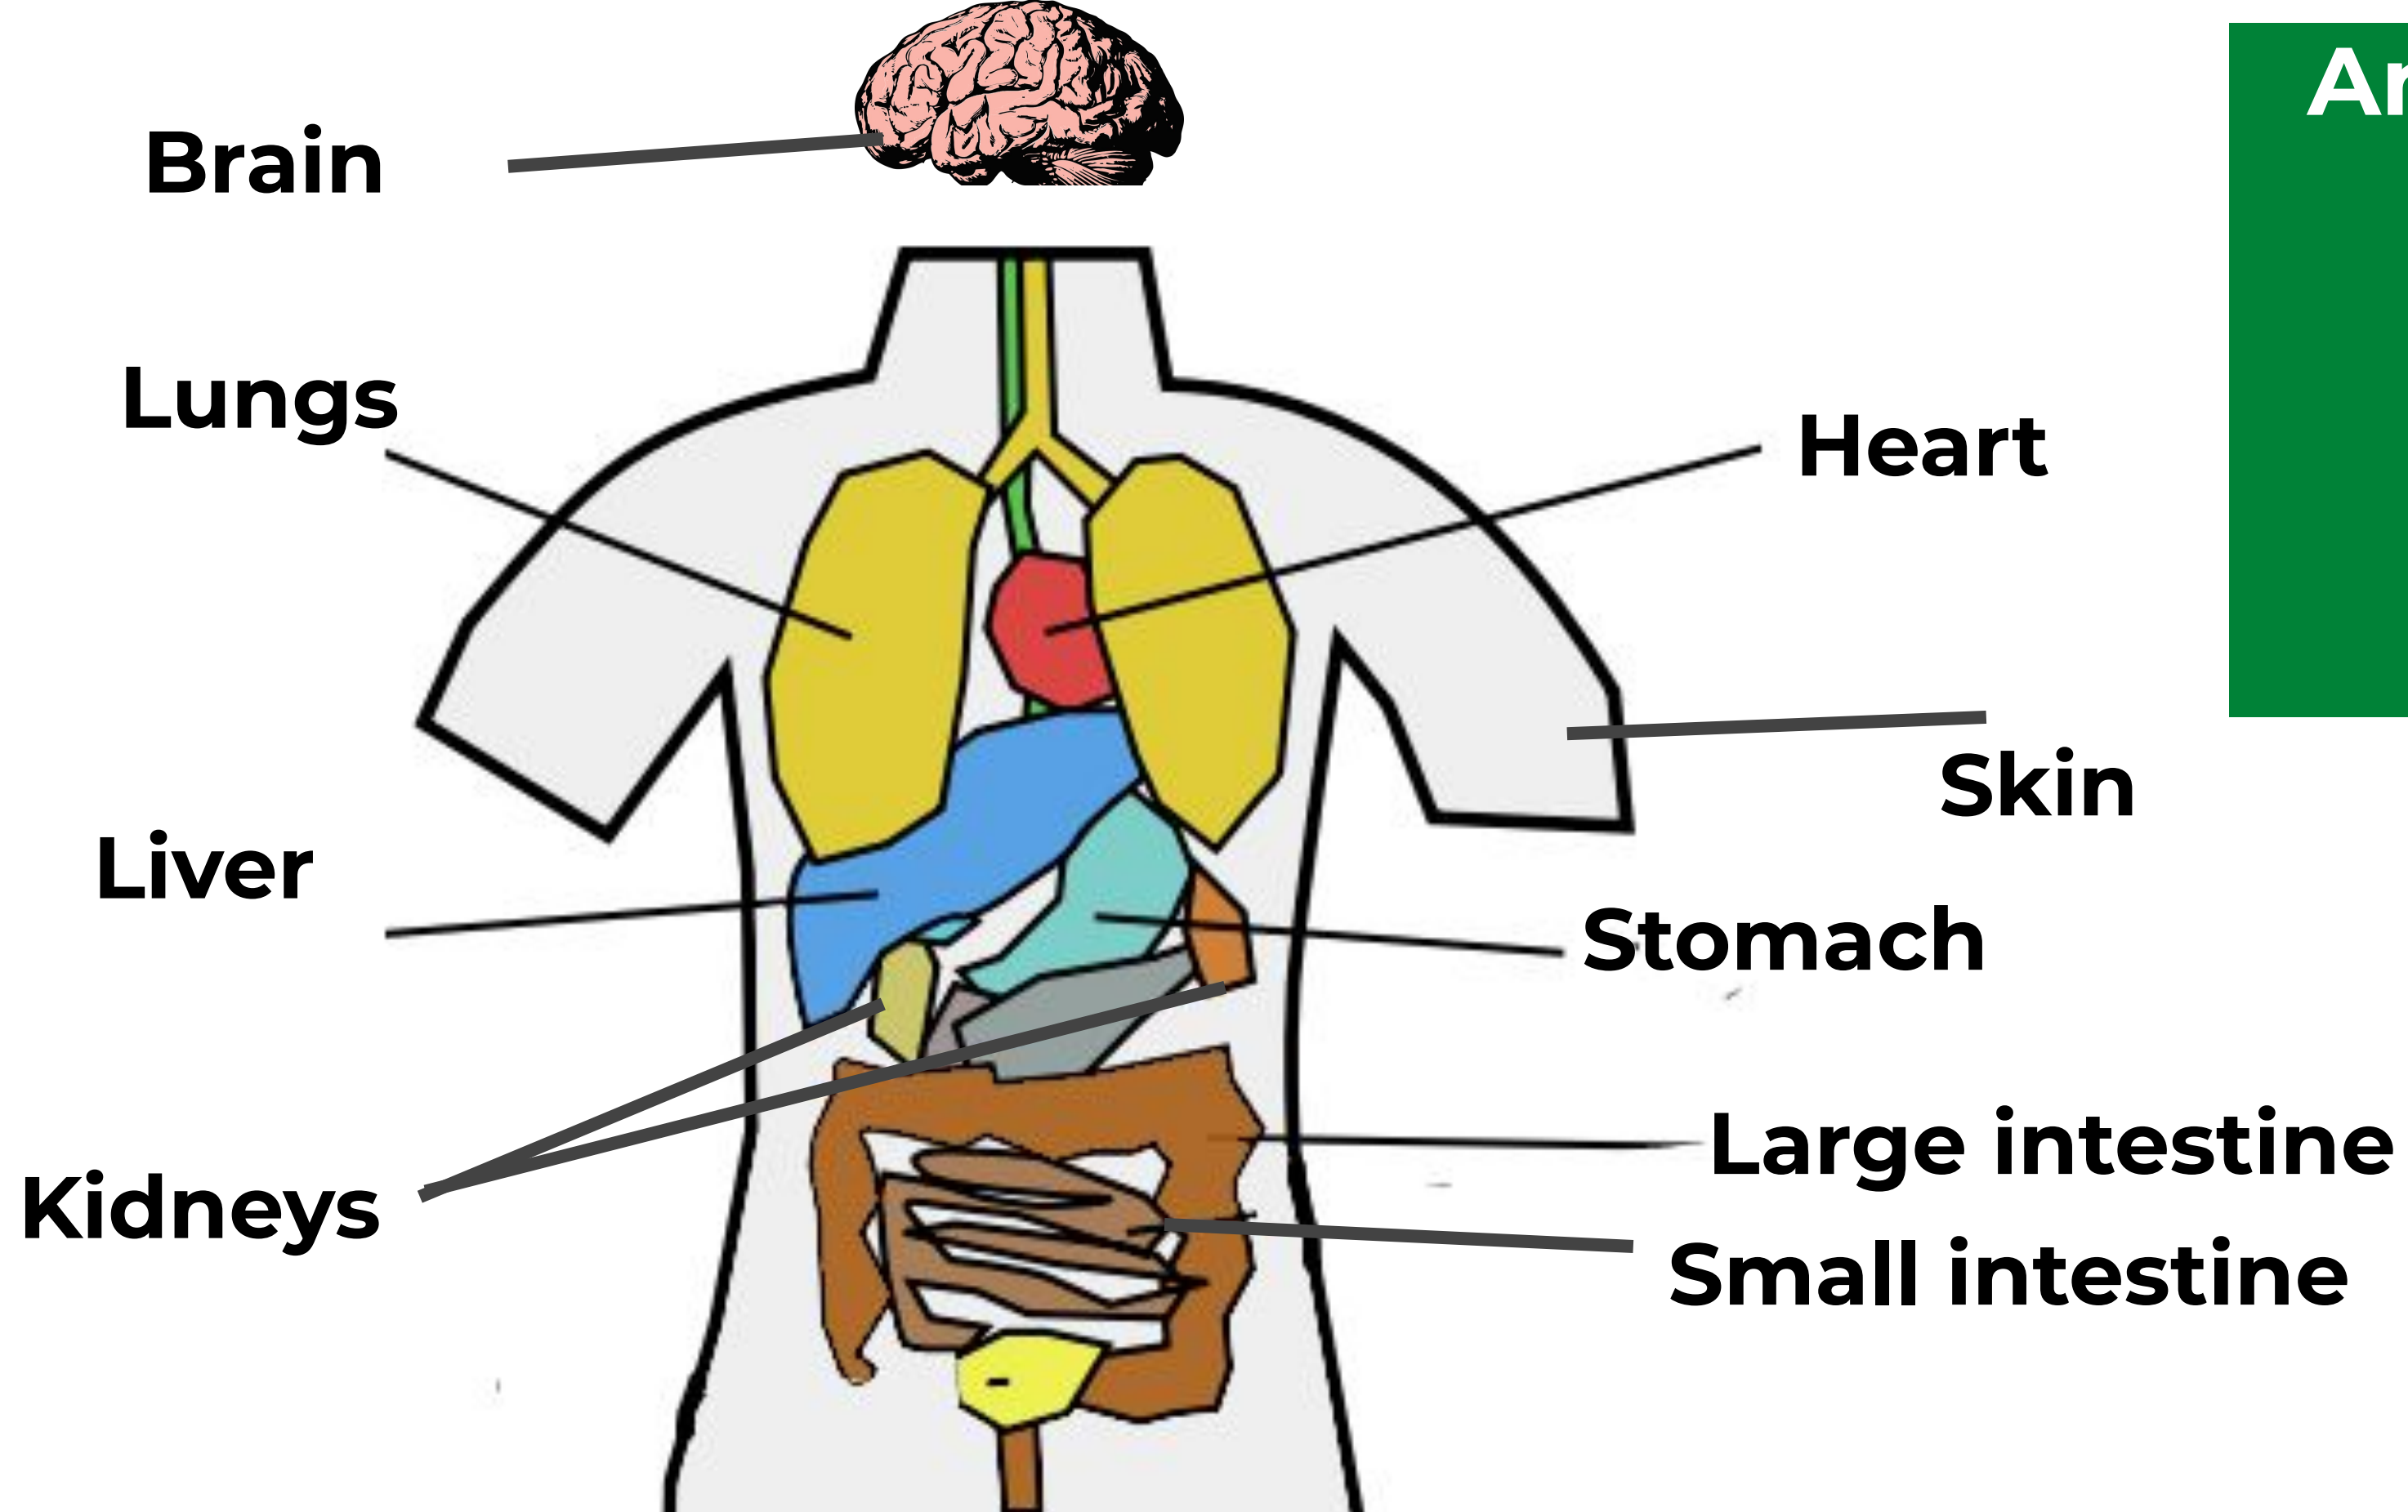

Can you label
the organs
that we have
mentioned so
far?
