

Combined Science - Biology - Key Stage 4

Metabolism

Miss Strmec

Independent Practice

Exam Style Question

Metabolism refers to all of the chemical reactions within the body. Describe five important reactions that are part of metabolism.

(5 marks)

Independent Practice

Match each of the molecules to the products they are made of (4 marks):

Proteins

Glycogen

Lipids

Urea

Glucose

Glucose + Nitrates = Amino Acids

Broken down amino acids

Fatty Acids + Glycerol
