Warm up

1. When non-metals react, do they form positive or negative ions?

2. When non-metals react, do they lose or gain electrons to their outer shell?

3. Which of the following are physical properties:
   - Melting point
   - Reaction with water
   - Boiling point
   - Reaction with oxygen
   - Density

Independent practice - describe the trend in boiling point

Halogen	Boiling point/ °C
Fluorine	-118
Chlorine	-34
Bromine	-59
Iodine	184

A good answer, always contains:

1. General description of a trend (increase/decrease)
2. States values from table WITH UNITS
3. Uses comparative language

As you go down group....

For instance.....

Independent task

1. What is the name given to group 7 elements?
2. Describe what happens to the boiling point as you go down group 7.
3. Describe what happens to the melting point as you go down group 7.
4. Explain why melting point increases as you go down the group.
