## Lesson 10 - Calculating speed using an equation

Physics-KS3

Forces and Motion

Mrs Wolstenholme

## Calculating Speed

| Speed | $=$ distance $\div$ | time |
| :---: | :---: | :---: |
| $(\mathbf{m} / \mathbf{s})$ | $(\mathbf{m})$ | $(\mathbf{s})$ |
| $(\mathbf{m i l e} / \mathbf{h})$ | $(\mathbf{m i l e})$ | $(\mathbf{h})$ |
| $(\mathbf{k m} / \mathbf{h})$ | $(\mathbf{k m})$ | $(\mathbf{h})$ |

Speed $=$ distance $\div$ time

|  | I ran 100 m in 25 seconds. Calculate my <br> average speed |
| :--- | :--- |
| Values <br> Equation <br> Substitute | Distance $=100 \mathrm{~m}$. time $=25 \mathrm{~s}$ <br> speed $=$ distance $\div$ time |
| Rearrange $\div 25$ |  |$\quad$| Answer | Speed $=4$ |
| :--- | :--- |
| Units | $\mathrm{m} / \mathrm{s}$ |

## 4 m/s

Speed $=$ distance $\div$ time

|  | The train travelled $\mathbf{5 5 0} \mathbf{~ k m ~ i n ~} \mathbf{2 . 2}$ hours. <br> Calculate my average speed. |
| :--- | :--- |
| Values | Distance $=\mathbf{5 5 0} \mathbf{~ k m}$. time $=\mathbf{2 . 2} \mathbf{~ h}$ |
| Equation | Speed $=$ distance $\div$ time |
| Substitute | speed $=\mathbf{5 5 0} \div \mathbf{2 . 2}$ |
| Rearrange |  | | Answer |
| :--- |
| Units | | Speed $=\mathbf{2 5 0}$ |
| :--- |
| $\mathbf{k m} / \mathbf{h}$ |

# 250 km/h 

Speed $=$ distance $\div$ time

|  | A caterpillar moved 2 m in 250 s. Calculate its <br> speed. |
| :--- | :--- |
| Values |  |
| Equation |  |
| Substitute |  |

Speed $=$ distance $\div$ time

|  | The tractor travelled 5 km in <br> 0.4 h. Calculate its speed. | Usain Bolt set a record when he ran 100m <br> in 9.58 seconds. What was his speed? |
| :--- | :--- | :--- |
| Values |  |  |
| Equation |  |  |
| Substitute |  |  |
| Rearrange |  |  |
| Answer |  |  |
| Units |  |  |

Speed $=$ distance $\div$ time

|  | A plane travelled 5,537 km from <br> London to New York. The flight took <br> 8 hours. Calculate its speed. | A snail moves 1 metre in 200 <br> seconds. Calculate the speed. |
| :--- | :--- | :--- |
| Values |  |  |
| Equation |  |  |
| Substitute |  |  |
| Rearrange |  |  |
| Answer |  |  |
| Units |  |  |

Speed $=$ distance $\div$ time

|  | A car travels at $30 \mathrm{~km} / \mathrm{h}$. <br> How far will the car have travelled after 1.5 h ? |
| :--- | :--- |
| Values | speed $=\mathbf{3 0} \mathbf{~ k m} / \mathbf{h}$. time $=\mathbf{1 . 5} \mathrm{h}$ |
| Equation | Speed = distance $\div$ time |
| Substitute | $30=$ distance $\div \mathbf{1 . 5}$ <br> $30 \times 1.5=$ distance $\div \mathbf{1 . 5} \times 1.5$ <br> $30 \times 1.5=$ distance |
| Rearrange |  |
| Answer | $45=$ distance |
| Units | $\mathbf{k m}$ |

## 45 km

## What is the next step?

$40=$ distance $\div 5$

## Option 1

$40 \times 5=$ distance $\div 5 \times 5$

## Option 3

$40 \div 5=$ distance $\div 5 \div 5$

## Option 2

$40 \times 40=$ distance $\div 5 \times 40$

## Option 4

PANIC!!

## What is the next step?

$6.5=$ distance $\div 1.5$

## Option 1

$$
6.5 \div 6.5=\text { distance } \div 1.5 \div 6.5
$$

## Option 3

$6.5 \times 1.5=$ distance $\div 1.5 \times 1.5$

## Option 2

$6.5 \div 1.5=$ distance $\div 1.5 \div 1.5$

## Option 4

PANIC!!

## What is the next step?

$35=$ distance $\div 4$

## Option 1

## Option 2

$35 \times 35=$ distance $\div 4 \times 35$

## Option 4

$35 \times 4=$ distance $\div 4 \times 4$
PANIC!!

Speed $=$ distance $\div$ time

|  | The fastest speed reached by a human in swimming is <br> $2.2 \mathrm{~m} / \mathrm{s} . H e ~ c o m p l e t e d ~ t h e ~ r a c e ~ i n ~$ <br> distance did he swim? |
| :--- | :--- |
| Values |  |
| Equation |  |
| Substitute |  |
| Rearrange |  |
| Answer |  |
| Units |  |

|  | A man swims at a speed of $4 \mathrm{~m} / \mathrm{s}$. <br> Calculate the distance swam in 25 <br> seconds. | A skate boarder has a speed of 11 <br> $\mathrm{~m} / \mathrm{s}$. Calculate the distance <br> travelled in 2.5 seconds. |
| :--- | :--- | :--- |
| Values |  |  |
| Equation |  |  |
| Substitute |  |  |
| Rearrange |  |  |
| Answer |  |  |
| Units |  |  |

## Independent practice

1. A model car travels 30 metres in 3 seconds. Calculate the speed.
2. A snail moves 1 metre in 200 seconds. Calculate the speed.
3. A fish swim 5 metres in 3 seconds. Calculate the speed.
4. A cat runs with a speed of $4 \mathrm{~m} / \mathrm{s}$ for 30 seconds. Calculate the distance covered by the cat.
5. A motor bike has a speed of $20 \mathrm{~m} / \mathrm{s}$. Calculate the distance covered in 20 s

## Same direction: Subtract

## Opposite direction: Add

Two cars are travelling in the same direction on a road.
The blue car is travelling at $\mathbf{2 5} \mathbf{~ m} / \mathrm{s}$ in front of the yellow car, which is travelling at $\mathbf{3 0} \mathbf{m} / \mathrm{s}$. What is their relative speed?

Relative speed $=\mathbf{3 0} \mathbf{- 2 5}=5 \mathrm{~m} / \mathrm{s}$

## Same direction: Subtract

Opposite direction: Add

A railway line and a road are side by side. A train and a car are travelling in the same direction, with the train in front of the car. The train travels at $52 \mathrm{~m} / \mathrm{s}$ and the car at $\mathbf{3 0} \mathrm{m} / \mathrm{s}$. What is their relative speed?

Relative speed $=\mathbf{5 2} \mathbf{- 3 0}=\mathbf{2 2} \mathrm{m} / \mathrm{s}$

## Same direction: Subtract

## Opposite direction: Add

Two cars are travelling on a road in opposite directions.
The blue car is travelling at $\mathbf{2 5} \mathbf{~ m} / \mathrm{s}$ and the yellow car is travelling at $\mathbf{3 0}$ $\mathrm{m} / \mathrm{s}$. What is their relative speed?

Relative speed $=\mathbf{2 5} \boldsymbol{+ 3 0}=\mathbf{5 5} \mathrm{m} / \mathrm{s}$

## How do you calculate relative speed of two objects moving in opposite directions?

## Option 1

Multiply them

Option 3

Subtract them

## Option 2

Add them

## Option 4

Divide them

## How do you calculate relative speed of two objects moving in the same direction?

## Option 1

Multiply them

## Option 3

Subtract them

## Option 2

Add them

## Option 4

Divide them

## Same direction: Subtract

Opposite direction: Add
Whilst tidying my lab, I was walking towards the bin at 4 mph and I threw a screwed-up piece of paper at 2 mph towards the bin. Calculate the relative speed of me and the paper.

## Same direction: Subtract

Opposite direction: Add
Whilst walking away from the bin at 3 mph I threw a screwed-up piece of paper at 2 mph towards the bin.

Calculate what I would observe the speed of the screwed-up piece of paper to be.

## Same direction: Subtract Opposite direction: Add

1. If you were travelling in the car at 40 mph , what speed would you observe an over-taking train travelling at 80 mph to be travelling at?
2. If you were travelling in a car that was travelling at 20 mph along the carriages of a train which was travelling in the same direction at 50 mph , what is their relative speed?
3. If you were travelling in a car at 30 mph and you threw a ball backwards at 3 mph , with what speed would you observe the ball to move away from you?
4. This morning I was travelling at 60 mph on the motorway when a car over took me. If the over-taking car was travelling at 73 mph , what speed did I observe the over-taking car to be travelling at?
5. Yesterday I was running at 5 mph along the canal when I over-took a barge travelling at 3 mph. At what speed did the barge captain observe my speed to be?
