

Maths

Reasoning with large whole numbers:

Comparing 5-digit numbers

Ms Jeremy

Pause the video to complete your task

Resume once you're finished

Using a number line to compare

a) 71 349	c) 91 374
b) 13 794	d) 43 179

Pause the video to complete your task

For each example, use a place value table to find the number with the greatest value.

62 459

26 594

49 264

82 771

82 717

82 177

Ten thousands	Thousands	Hundreds	Tens	Ones

Pause the video to complete your task

How could we arrange these digits to make:

- i) the number with the greatest possible value?
- ii) the number with the smallest possible value?

Resume once you're finished

Independent Task

1. Draw a place value table.
2. Roll the dice 5 times (use number cards if necessary).
3. Each time you roll, decide where to place your number on the place value table to achieve the number with the greatest value.
4. Explain your reasoning and repeat 5 times.

Challenge:

Arrange your digits to create a number:

- i) Greater than 30 000
- ii) Less than 12 000

Ten thousands	Thousands	Hundreds	Tens	Ones
