Combined Events and Tree Diagrams 2

Yasmin has a biased coin. The probability that it lands on Heads is 0.7. She flips the coin three times.

- a) Complete the tree diagram to show all the possible outcomes.
- b) What is the probability that it lands on Heads every time?
- c) What is the probability that it lands on Tails at least once?
- d) What is the probability that it lands on Heads at least twice?
