

Mathematics Independent Task

Understanding commutativity

Miss Robson

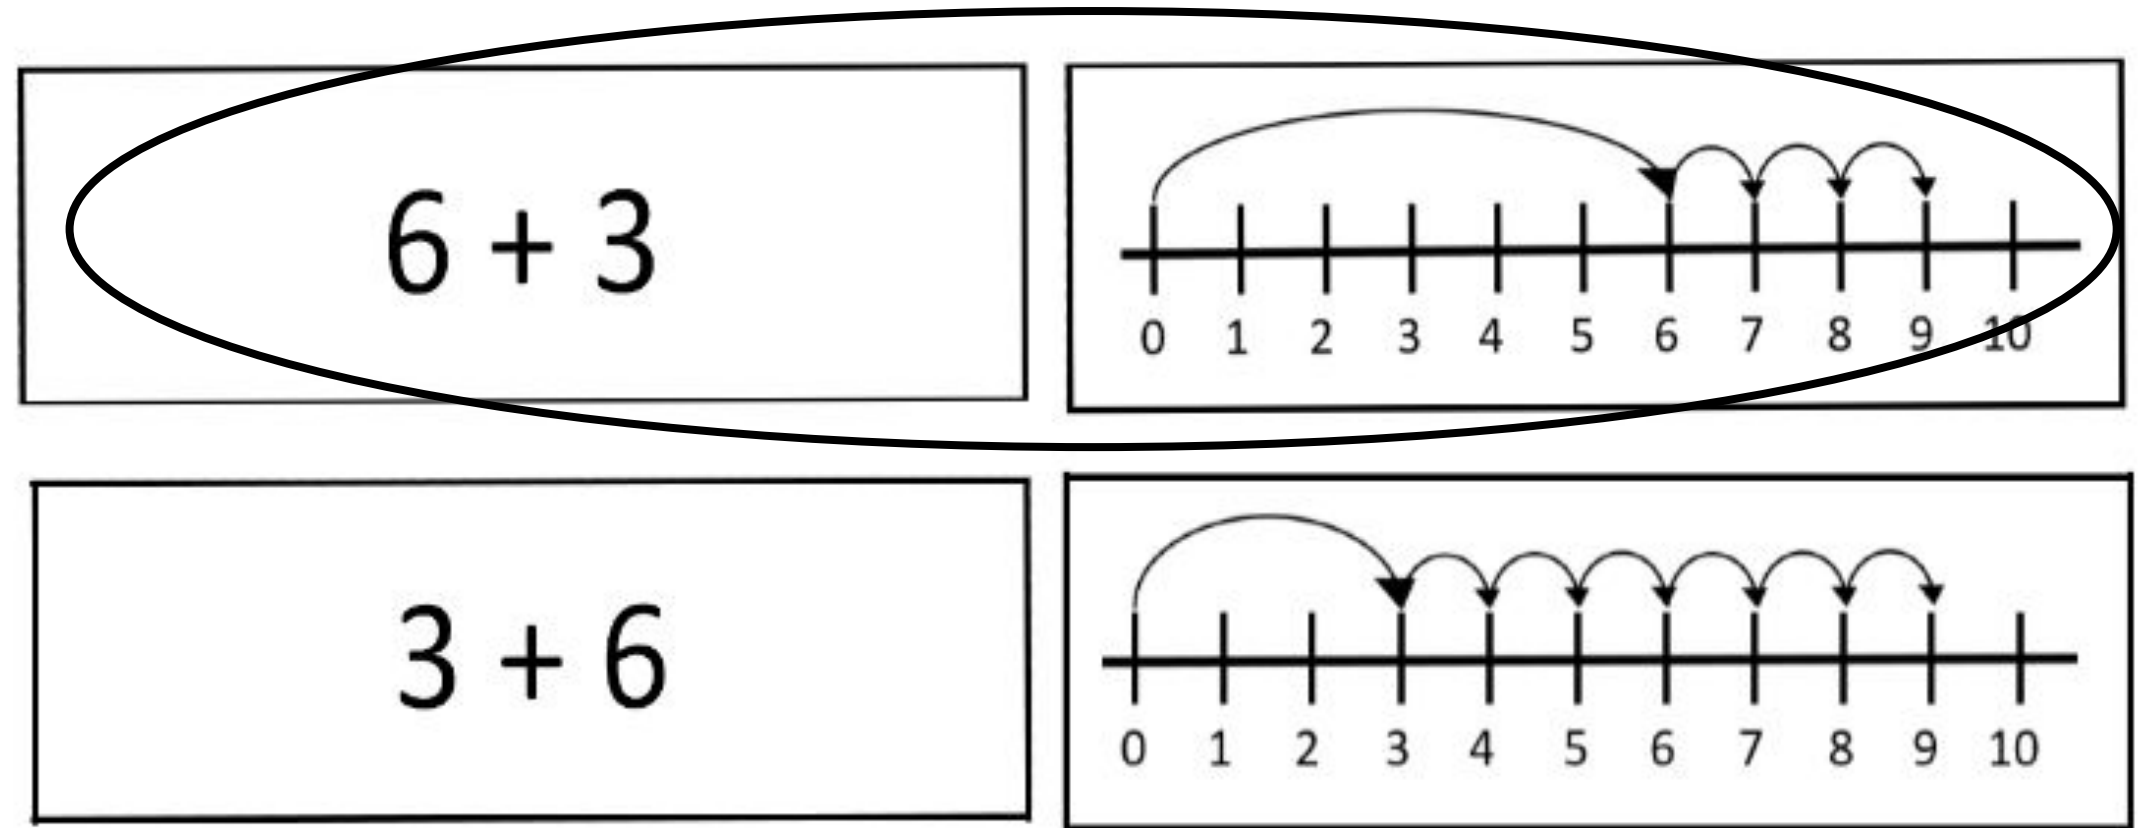

Example

Step one: match the equations to their number line.

Step two: match the pairs of equations together.

Step three: choose which of the pair you think is the most efficient method of counting on
- I have circled my choice here.

Task

Step one: match the equations to their number line.

Step two: match the pairs of equations together. There are 3 pairs.

Step three: choose which of the pair you think is the most efficient method of counting on.

$$8 + 2$$

$$7 + 0$$

$$0 + 7$$

$$2 + 8$$

$$1 + 5$$

$$5 + 1$$
